FREQUENTLY ASKED QUESTIONS

Q: What is the benefit of having silicone in a product?

A: Silicone acts as a sealant, locking in moisture and other ingredients that are blended into the product. Being that Devoted Creations™ products are aloe based – the silicone will seal in the aloe along with other added moisturizers. In addition, skin firming and anti-aging ingredients, as well as additional benefits such as bronzers and tingle ingredients will also be locked in resulting in more intensified results.

Q: What is the benefit of Cashmere Blend?

A: Cashmere Blend formula acts as a 24 hour moisture system that works as a humectant to draw moisture from the air and lock it into your skin.

Q: What is the difference between Silicone and the Tapioca Starch Blend?

A: Both formulas work to lock in moisture, however, the Tapioca Starch Blend absorbs into the skin providing intense hydration while the Silicone Blend acts as a sealant.

Q: What is the difference between BB, CC and DD Crème?

A: BB Crème formula will prime, perfect and correct the skin for an overall more even, clear and youthful appearance.
CC Crème helps protect, correct and perfect skin's overall color and appearance.
DD Crème formula mattifies, protects and gives skin a flawlessly airbrushed result.

FREQUENTLY ASKED QUESTIONS

Q: What is the difference between C5 and Silicone?

A: They both provide locking in moisturizer agents to deliver intense hydration. However, C5 has a silicone feel without the silicone.

Q: Why should I use a tan extender?

A: Using a tan extender helps prevent dry skin. It can also benefit making your tan last longer.

Q: For a client going on vacation is there a product they can use to make their tan last longer?

A: Yes, our going darker drops! You can add them to any of our tan extenders. We also have tan extenders that contains DHA. Please see the product section to identify those extenders.

Q: What is the benefit of using a CBD tanning lotion?

A: Using a tanning a CBD tanning lotion will improve your skins response to dry, tired and irritated skin.

Q: Why is it important to rotate using different tanning lotions?

A: It is good to rotate using different tanning lotions, so your tan doesn't hit a plateau. Try switching it up every other bottle to get maximum results.

Q: What are the benefits of using an aloe based tanning lotion?

A: Unlike water-based lotions that evaporate, Aloe sits on the skin, so it is more hydrating during your tanning session.

Q: What products are best for a client that wants a bronzer, but doesn't want to have to worry about staining or streaking?

A: Any of our natural or cosmetic bronzing lotions would be perfect for a client that that wants a bronzer that can be applied quickly for a tanner in a hurry. You can shower sooner, and it can even be used outdoors.

Q: What would I sell a customer who has sensitive skin?

A: Devoted Creations™ tests all of it's products thoroughly for sensitivity and irritation. However, some people have more sensitive skin than others. For those tanners, Devoted Creations™ has several products that are hypoallergenic. Please see the product section to identify these lotions.

Q: Why should a tanner purchase a moisturizer by Devoted Creations™?

A: Mass market moisturizers contain alcohols and mineral oils which are damaging to the tan. Devoted Creations™ moisturizers are aloe based and therefore intensely hydrating. They will nourish the skin, extend the life of the tan, while also providing skin firming and anti-aging benefits.

Q: Why should a tanner use a facial product?

A: The skin on our face is much more delicate than on the rest of our bodies. It also naturally exfoliates at a much quicker rate. Facial products are specifically designed to be non-comedogenic, slow down the exfoliation process, provide additional skin tightening and anti-aging benefits, while developing dark, long-lasting tanning results.

CATEGORIES OF LOTION

Pure Lotions/Accelerators

What they do:

Accelerate the tanning process by speeding up melanin production and stimulating tyrosine activity.

How they do it:

Utilizing tyrosine as well as other various trademarked technologies such as Mela-Dark™, MelaTime™, MelanoBronze™, or Nouritan™ Devoted Creations™ products are able to develop fast, dark tanning results.

Things to know:

Pure lotions, in addition to various accelerators, also contain skin firming and anti-aging benefits.

Who they are designed for:

New tanners, lunch time tanners and those who just want a natural tan without the addition of bronzers or tingles.

CATEGORIES OF LOTION

DHA Bronzers

What they do:

Creates a tanned appearance on the skin within 2-3 hours of your tanning session and lasts approximately 5 to 7 days depending on the rate of exfoliation.

How they do it:

DHA reacts with amino acids on the outer layer of the skin to create a brownish color. Products containing DHA should be applied in even, circular motions. The palms of the hands and in between the fingers should be washed after application.

Things to know:

Most of Devoted Creations™ products contain a consistent level of DHA – enough to create a tanned appearance but not so much that the tanner needs to be concerned about streaking or turning orange. There are a few products by Devoted that do contain higher levels of DHA and therefore, are more intense bronzers and should not be sold to the inexperienced tanner.

Who they are designed for:

Designed for advanced tanners who are looking to achieve the darkest tan imaginable. These are great for tanners who are looking for faster and longer lasting results.

CATEGORIES OF LOTION

Natural Bronzers/DHA Free Bronzers

What they do:

Create a tanned appearance on the skin supplementing the natural tan – this can be an immediate or a delayed reaction depending on the ingredient.

How they do it:

They slightly tint the skin imparting the color of the natural ingredient upon the skin.

Things to know:

Devoted Creations™ combines natural bronzers with DHA in many of its bronzing lotions to enhance the bronzed results. There are several bronzing lotions that contain more natural bronzers than others and there are a few products that solely contain natural bronzers.

Who they are designed for:

All tanners can benefit from natural bronzers. They work with DHA in certain products to intensify the results – creating a more bronzed color. Products containing natural bronzers and no DHA are great for tanners who are looking for subtle bronzing results without streaking or staining.

CATEGORIES OF LOTION

Cosmetic Bronzers

What they do:

Create immediate bronzed results on the skin.

How they do it:

Just like the name implies – cosmetic bronzers are a type of “makeup”. They impart immediate color to the skin that washes off with water.

Things to know:

Devoted Creations™ uses cosmetic bronzers that deliver immediate bronzed results without a “paint-like” application or result. If any staining on clothing – or streaking should result, it can easily be washed off. The addition of a cosmetic bronzer is great for new tanners to learn how to apply lotion or for those wanting instant color. Devoted Creations makes products with just cosmetic bronzers, and those with a combination of cosmetic, DHA and/or natural bronzers.

Who they are designed for:

Tanners who want subtle, immediate color.

CATEGORIES OF LOTION

Tingle Product

What they do:

Create an immediate reddening and warming sensation on the skin.

How they do it:

A combination of Benzyl and Methyl Nicotinates are used to create an increase in the microcirculation of the skin. The increase in circulation generates an increase in the oxygen output which results in a darker tan. The increase in blood flow results in a reddening effect as well as a "tingle" sensation.

Things to know:

Tingle products should NOT be used by inexperienced tanners and the effects should be thoroughly explained to those new to using a tingle product. With that being said, tingle products are great for tanners that have reached a plateau and need help getting darker. Tingles should be spot tested on the inside of the arm for sensitivity and tolerance before being applied to the entire body during a tanning session. They can be used only on the legs to help achieve a more even looking tan for those whose legs do not tan as easily. Tingle products should NEVER be used on delicate facial skin and tanners should be informed that the "tingle effects" (ie: reddening and warming sensations) CAN BE TRANSFERRED to children and pets. If a tanner decides that the experience is too intense – they should be informed NOT to try to wash it off. The best course of action is to wait it out and apply a product designed to soothe the skin.

Who they are designed for:

Advanced tanners who are looking to go beyond the tanning plateau.

CATEGORIES OF LOTION

Blush Product

What they do:

Create an increase in the microcirculation of the skin which results in a darker tan. Some tanners with sensitive skin might notice a slight reddening effect on the skin.

How they do it:

Low levels of Benzyl Nicotinate are used to increase the blood flow without the irritation of a full tingle product.

Things to know:

Blush products are designed for tanners that need help breaking through the tanning plateau, but do not enjoy the skin sensation that accompanies a tingle product.

Who they are designed for:

Any tanner who wants the results of a tingle product without the reddening or irritation to the skin.

CATEGORIES OF LOTION

Cooling Product

What they do:

Create a refreshing and cooling sensation on the skin.

How they do it:

Use a blend of ingredients that create an instant and long lasting cooling sensation.

Things to know:

Cooling products counteract the heat of the tanning bed.

Who they are designed for:

Any tanner especially those using high pressure equipment or stand up units, who want a refreshing, cooling experience.
